

Dark Eye Circle, Puffy Eyes

Occhio

Dark Eye Circle & Puffy Eye Cream

Description

Both men and women suffer from dark eye circles. These can be aggravating, especially among business professionals with demanding travel schedules, hectic work schedules, and little time to sleep. Red blood cells get lost and make their way into the skin. This starts in the capillaries, and basically the red blood cells line up to get through a

tiny passage. Some of the cells get lost and make their way into the surrounding areas. As these cells get "cleaned up" naturally, the result is a red color that is visible outside the skin. The best way to treat dark eye circles is to use a dark circle eye cream. This Eye cream is formulated especially for dark circle, and works wonders on the pesky signs of aging. The

active ingredients contained in EYE PUFFY CREAM work at reducing wrinkles, lines and crows' feet while promoting better circulation and a healthier skin tone. Other active ingredients fights puffy, baggy eyes as well as dark rings around the eyes on different levels to ensure younger looking eyes.

Role of Occhio In Dark Eye Circles & Puffy Eyes

Caffeine

Caffeine, when applied to the delicate area of skin and tissue around the eye through either an eye cream or an eye gel, stimulates the skin first. It helps to tighten the skin by reducing the amount of

moisture in the cells that causes bags. Once it enters into the tissue beneath the skin, it gives your natural collagen a boost and forces it to start creating more collagen to give a firm look to the skin. Caffeine

doesn't just stop there. It also increases blood flow through the capillaries which also helps the skin and tissue repair itself and can reduce dark circle under the eyes.

Bioskin™ Up Contour

Innovative dermocosmetic active, composed by concentrated extracts of Pfaffia, Ptychopetalum olacoides and Lilium candidum, a synergic association standardized in saponins and flavonoids.

Bioskin up contour is indicated to be applied in

smoothing, whitening and/or lessening cosmetic products for dark circles, under eye bags and puffiness around the eyes in the face.

- Decrease of periorbital hyperpigmentation (repair of microcirculation by anti-inflammatory action);

- Decrease of edema (decrease of the fluid depot by draining effect);
- Decrease of under eyes bags (lipolytic effect);
- Vascular wall strengthening and tissues repair (collagen and elastin synthesis)

Acetyl Octapeptide-3

It reduces the depth of wrinkles on the face caused by the contraction of muscles of facial expression,

especially in the forehead and around the eyes. It's a milder alternative to Botulinum Toxin, topically

targeting the same wrinkle-formation mechanism in a very different way.

Hyaluronic Acid

Hyaluronic acid is a characteristic component of the connective tissue and for many years now cosmetic

science has taken advantage of its main characteristic which is its ability to bind water. For

this reason it is used in preparations for dry and lifeless skin.

"Soft Focus" Powder

Powders with an optimized "soft focus" effects: the particle size is characterized by a bi-mode

distribution: the small particle provide more uniform coverage of skin imperfection with ideal

"soft focus" property while the larger particles offer an enhanced soft feel.

Vitamin E

A vitamin whose virtues have been known since the dawn of cosmetics.

It has moisturising and anti-free radical properties, carries out an anti-inflammatory action, reduces

lipid peroxidation and defends the skin from ageing.

Vitamin A

This functional substance is indispensable for regulating the keratinisation process. It performs a

skin protecting action against skin dryness.

water from the air, aiding skin and hair moisturization.

Panthenol

Panthenol is a penetrating moisturizer which absorbs into the skin and hair and is converted into

Pantothenic Acid, a B complex vitamin. Assists skin care products in retaining water and also absorbs

water from the air, aiding skin and hair moisturization.

Directions

Every day after cleansing and toning, gently pat a small amount onto the brow bone and

beneath the eye

water from the air, aiding skin and hair moisturization.

Features

- Occhio for dark circles and puffiness will help you get rid of tired looking eyes.
- Occhio is gentle and highly effective. Gives dramatic results within 28 days.
- BIOSKIN™ UP CONTOUR the most complete and scientifically based dermocosmetic active having triple action: anti-inflammatory, anti-

- edematous and venous protective makes Occhio an excellent eye product like no other in the market.
